MEET OUR BRAND

Visual execution plays a key role in how we engage with our audiences.

In these guidelines, we'll explore the visual and stylistic elements that bring our brand to life. You'll learn how to use our visual brand system consistently and ways to infuse our unique personality across our communications & touch-points.

Establishing brand consistency is a journey, let this be your guide.

Principles

Disruptive Innovation

Innovative technologies are charting a bold future for industry and humanity. Our customers are at the bleeding edge. With our solutions, they're able to innovate boldly.

Deep-Tech

Technologies like artificial intelligence, block-chain, robotics, and quantum computing are deeply complex. Synopsys technology is at the heart of these amazing innovations.

Inclusive

In this interconnected, digital, and diverse world, we communicate daily on a global stage. Inclusivity in our creative and digital experiences is top of mind and priority.

Highlights

Typography

Our primary use font, Roboto, is modern and clear, and can be utilized in several weights. Arial is an alternate.

Angular

From our signature facets to photos featuring our tech, angles embody our position at the leading edge of design.

Signature Purple

We like to keep things neutral, but our signature purple color provides the right amount of emphasis and visual interest when appropriate.

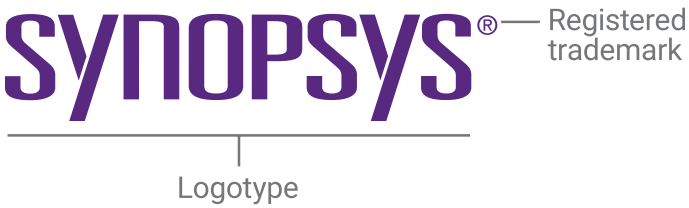

LOGO

Our logo is our most valuable asset.

It is straightforward, simple, and direct, reflecting the personality of a market leader.

Care should be taken to assure that the logo is never modified and used always in a complimentary manner.

The area surrounding the logo must be clear of text and other competing elements. The minimum clear space is the “x” height of the “s” in Synopsys.

The minimum size of the logo for print use is 85px wide at a standard screen resolution of 72 dpi.

The Synopsys logo is available in a number of color variations and formats to meet the needs of a variety of design layouts. The full-color logo against a white background is preferred as this provides the highest contrast artwork. Use the solid-black logo when color reproduction is limited or unavailable. Use the solid-white logo when placed against dark backgrounds.

Solid Black Logo with Tag Line

Solid White Logo with Tag Line

Logo In Use

The first choice is to place the color logo on a solid white background. The second choice is to use the white or reversed logo on a solid dark color background whenever possible.

But in instances when using the logo over colors, patterns or images, it is critical to maintain the contrast between the background and logo to optimize legibility.

The examples below illustrates the logo and background combinations dos and don'ts.

Abstract Pattern (Primary)

Tech Image (Reversed)

People (Grayscale)

Abstract Pattern (Black)

Not Enough Contrast

Too Busy

Too Busy

Too Busy

Logo Misuse

We have placed strict limitations on usage of the Synopsys logo to preserve the integrity of the brand.

The examples on this page illustrate some, but not all, potential misuses of the logo. Keep in mind that the logo is carefully rendered artwork and any alteration of the logo, apart from proportional scaling, is considered misuse.

DO NOT change the logo color or orientation.

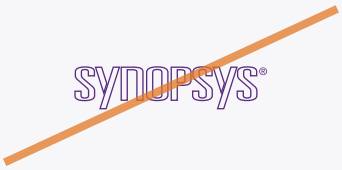

DO NOT skew, distort or rotate the logo.

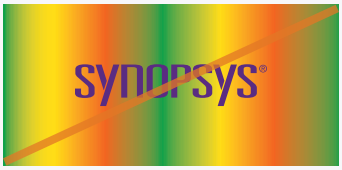

DO NOT apply a gradient or pattern to the logo.

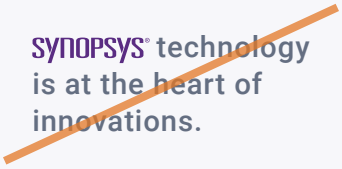

DO NOT outline or add stroke to the logo.

DO NOT place logo on busy background.

DO NOT use the logo in a sentence, headline or title.

DO NOT use graphic effects on logo (e.g. drop shadows).

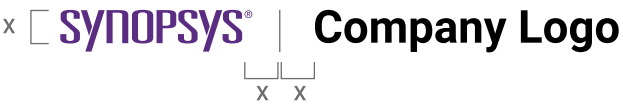

DO NOT retype or recreate any portion of the logo.

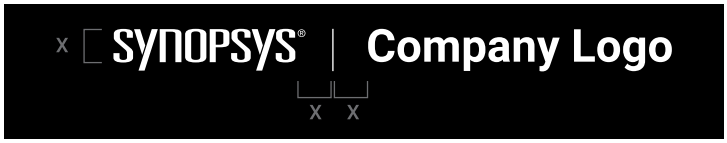

Partner Logo Lockups

Use a vertical rule and even spacing to separate the Synopsys logo from the partner logo.

COLOR

Our brand colors reflect the confidence and strength as a market leader.

Keeping designs consistent with our mindfully selected color palette—with a nod to our signature purple hue in all contexts—is crucial for communicating the Synopsys brand in every context.

We use the hierarchy of colors within' our palette to create distinctly unique visual identities for communicating our essence.

Primary Colors

Synopsys purple, black, white and neutral shades of gray should predominantly occupy the space in designs.

Black

0/0/0/100
0/0/0
#000000

White

0/0/0/0
255/255/255
#FFFFFF

Synopsys Purple

PMS 268
81/100/11/2
90/42/130
#5A2A82

Light Purple

PMS 2587
58/76/0/0
126/69/175
#7E45AF

Dark Gray

PMS 431
65/52/36/10
100/110/129
#646E81

Light Gray

PMS Cool Gray 5
31/24/25/0
179/180/179
#B3B4B3

Secondary Colors

Use these colors when additional shades are needed for accents, or to differentiate different sets of data or information.

Blue

PMS 2727
82/43/0/0
0/129/254
#0081FE

Teal

PMS 7710
81/0/23/5
0/165/168
#00A5A8

Lime

PMS 7737
58/1/93/10
121/161/51
#79A133

Forest

PMS 7731
80/7/90/22
38/135/77
#26874D

Accent / Use Sparingly

Use these shades only when the secondary color palette does not provide enough options for multiple data sets, or when a highlight color is needed.

Gold

PMS 1235
0/31/98/0
253/183/26
#FDB71A

Orange

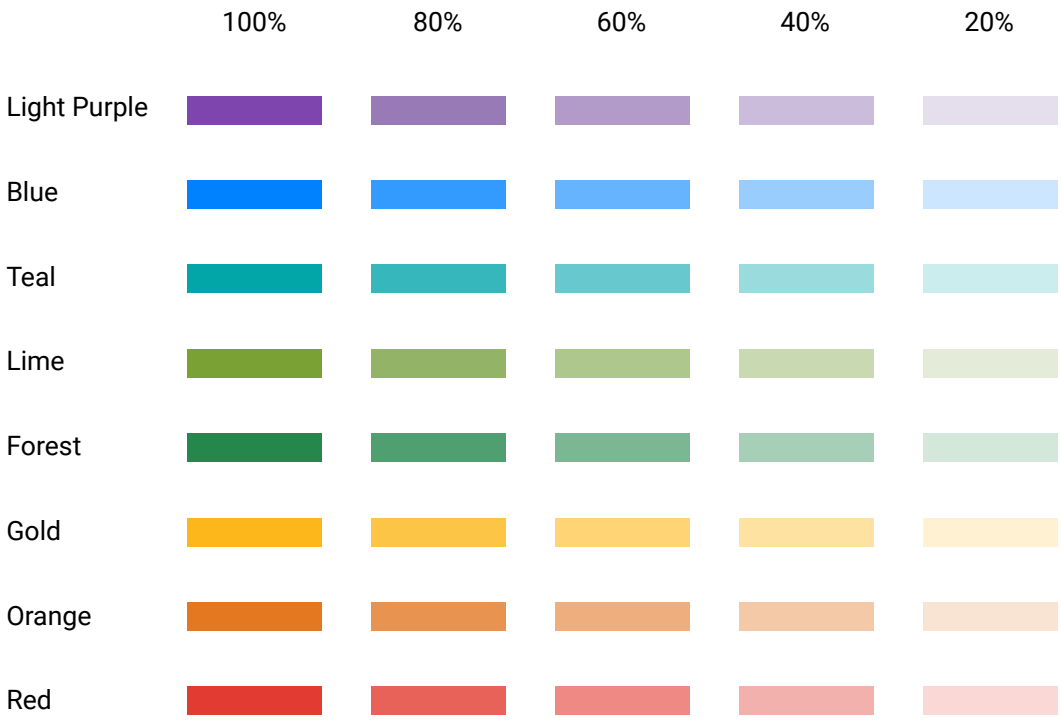

PMS 158
0/62/97/0
227/120/38
#E37820

Red

PMS 179
0/88/85/0
226/59/49
#E23B31

Supplemental Tints

Tints are used primarily in Charts & Graphs when needed, e.g., when the data represented requires more than the solid colors in the palette. Only use tints in 20% increments.

TYPOGRAPHY

Our typography is designed to work harmoniously with every graphic component.

We choose the Roboto font family because it embodies these characteristics.

The Roboto family of fonts is available in 5 weights with 10 styles, providing designers with a wide range of choices.

Roboto has a dual nature. It has a mechanical skeleton and the forms are largely geometric. At the same time, the font features friendly and open curves. This makes for a more natural reading rhythm more commonly found in humanist and serif types.

IMAGERY

Our image style is deep-tech. Imagery is vibrant and diverse, with a focus on innovations of the future.

Our photography and images should tell the story of Synopsys and showcase how our tools and solutions help bring pervasive intelligence to life.

People in these images should convey a sense of warmth and be engaged with their environment or a specific technology.

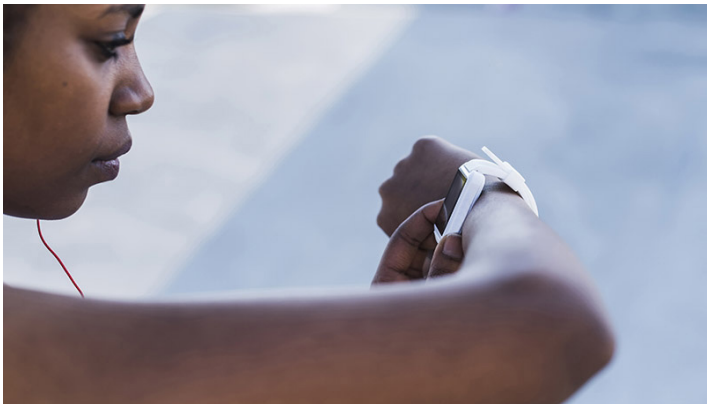

Imagery standards should extend across our products, markets, and geographies.

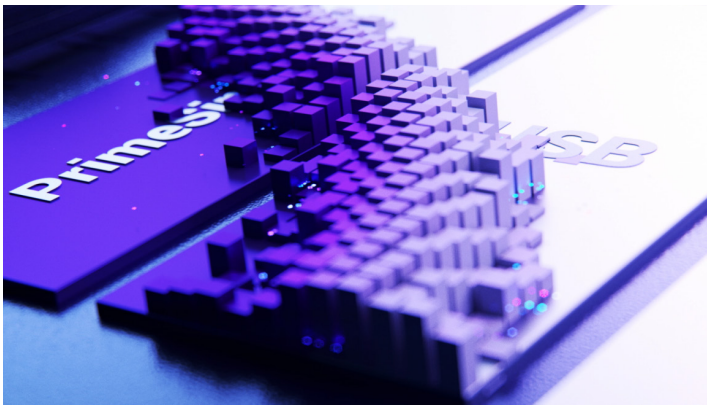

Show the places where our clients are and where we affect their world.

The above is a small subset of the vast imagery available. Special access users can request our fully curated image library by emailing us at identity@synopsys.com

VISUAL DESIGN ELEMENTS

Design elements are used to establish a strong, consistent presence through out Synopsys' visual communications.

The Wedge

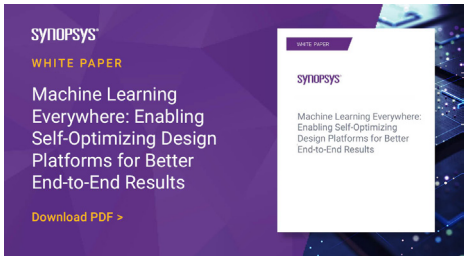

The wedge may be used as a parallelogram where both left and right sides are angled or only the right side angled depending on size, style, placement and other factors.

- Shear angle = 17.7º
- Color = PMS 268C
- Opacity = if over an image the wedge should be at 80% opacity. If used without an image the wedge should be at 100% opacity

The Wedge In Use

Facets

The facets represent vitality, evolution, and complexity. It's an interpretation of how technology is omni-present in our lives and how that technology is made possible by Synopsys.

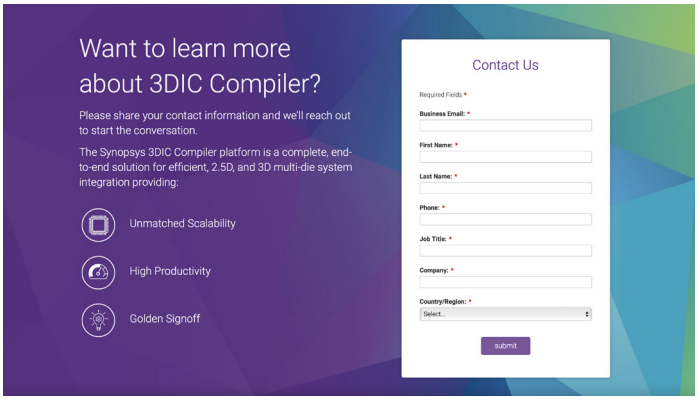

- The facets should always pull from our brand colors and display a transition between two analogous colors
- The facets should always have a source of light coming from the top and have darker shades on the bottom

Facets In Use

Facets should always be contained in the wedge or rectangular shapes, never be free formed.

When using facets as background, text should be large enough to be clearly visible when placed on top of facets. A defined gradient from the brand colors should be used.

Examples of full facets background usages with the white Synopsys logo. The logo should be large enough to be clearly visible when placed on top of facets.

Facets Misuse

In order to retain a consistent look and feel of the facets, please ensure that they fit within the guidelines. Here you'll find a few ways that facets start to look different than intended. These types of applications should be avoided.

Facets should always be contained in the wedge or rectangular shapes. Never place the facets on top of photography, whether transparent or opaque.

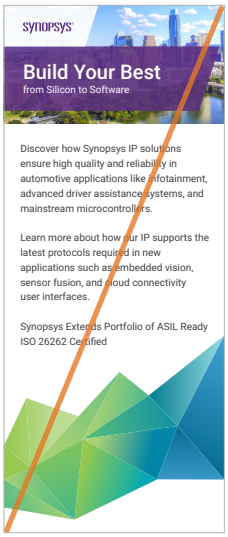

Facets should not transition between colors that are not analogous in the brand color palette. Facets should never be too pointy or too flat.

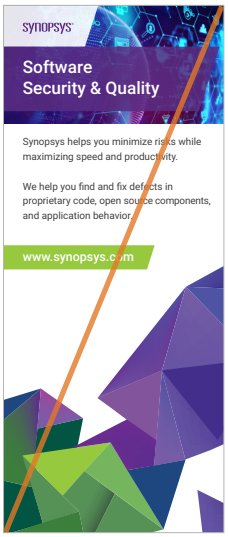

Facets should never compete with the visual hierarchy of our logo of wedge.

The wedge is our predominant visual element. The facets should not detract from this. In general, the facets should not be paired with our purple Synopsys wedge.

When working with our established visual elements, (i.e. our Synopsys wedge), the facets should be minimized.

Facets are competing in visual hierarchy.

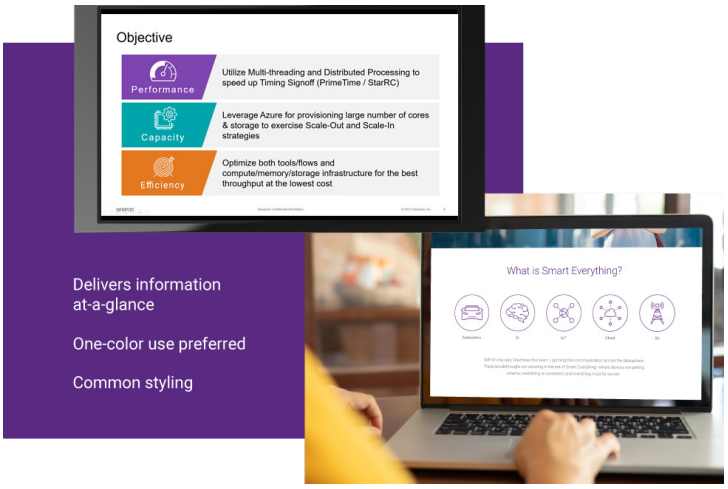

There should not be empty white space around the edge.

ICONOGRAPHY

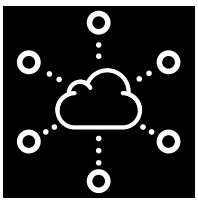

Our custom icons help communicate a unique suite of markets, products, services, and solutions.

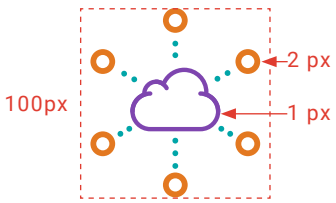

- Basics: 100 x 100 pixel art board
- Main stroke thickness: Use 2 px. Go up or down in .5 px increments
- Limit number of colors: On single icon use no more than three (3) colors
- Primary color (refer to 'Colors' page): Light purple
- Secondary color (refer to 'Colors' page): Teal
- Accent color (refer to 'Colors' page): Orange
- Text color: Any of the colors listed above may be used for text that is incorporated into the icon. For supporting copy such as name of service, use Dark Gray.

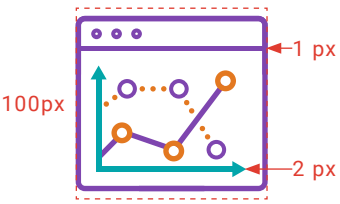

One-color Icon

DIAGRAM

Our diagram style is clean and straightforward, with easy-to-digest graphics.

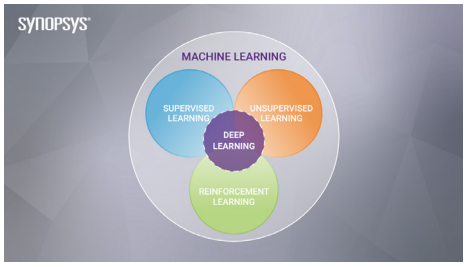

Diagrams, graphs and charts should use only the approved brand colors. You can find the complete corporate color palate on the Colors page. Avoid most stylized effects like drop-shadows, gradients, and glows. Seek to create graphics that can work seamlessly in print and on the web.

Virtual Event

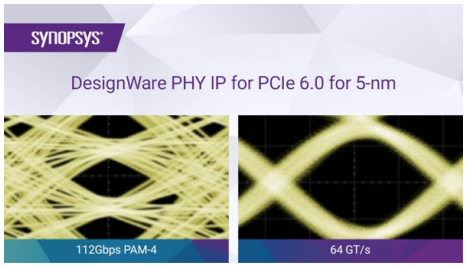

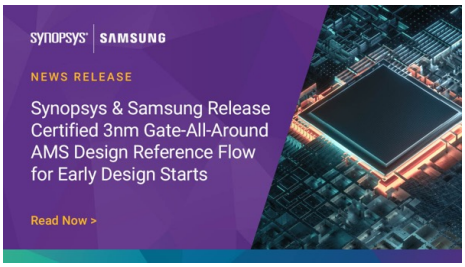

Virtual Event

Regardless of the medium, platform, or region, designs are unified. From ads to collateral, datasheets, whitepapers, and social, we deploy design systems meant for scale.

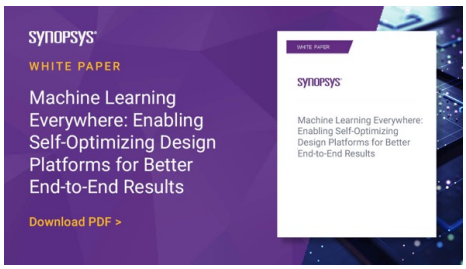

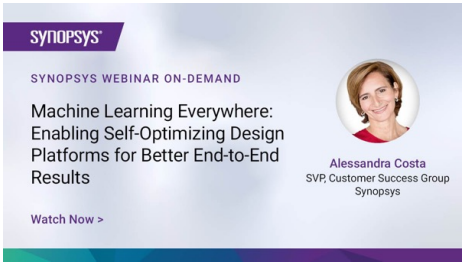

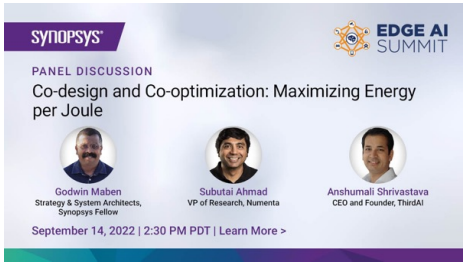

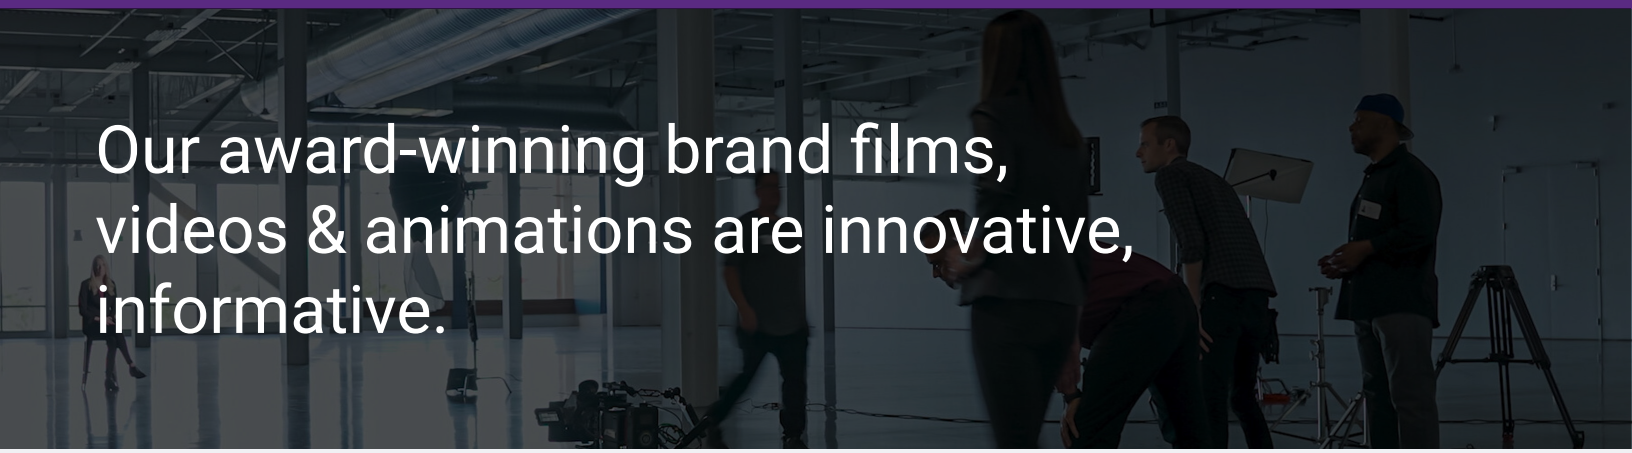

FILM & VIDEO

Our award-winning brand films, videos & animations are innovative, informative.

Falling into one of the three categories and often sharing multiple qualities, each film & video is tightly coordinated.

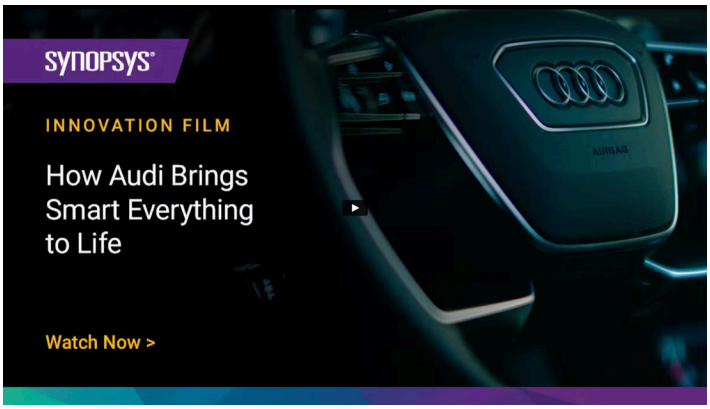

We mix premium design, motion, and story to expertly execute a whole experience.

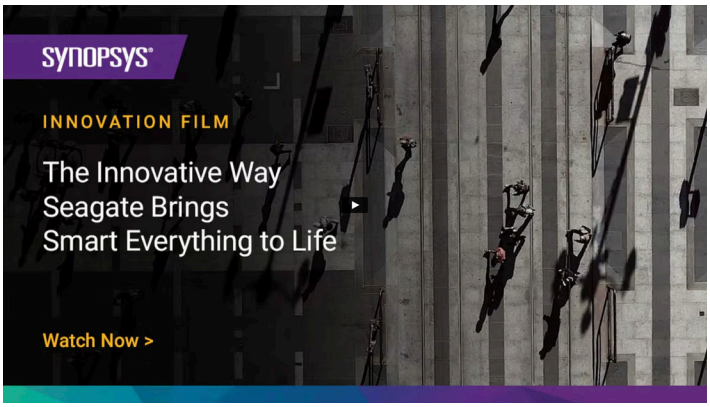

With a vast library of material, we enable producers company-wide to execute our high standards at scale and for a variety of form factors.

Innovative

Technological innovations are charting a bold future for humanity and our customers are at the bleeding edge. We curate each sight, sound, texture, and mood to keep up with the pace of innovation.

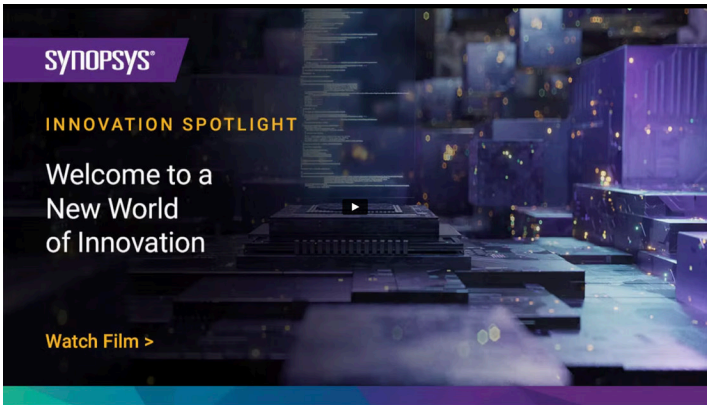

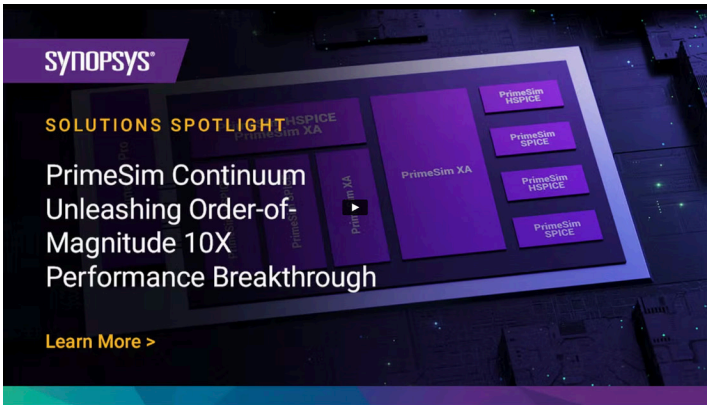

Informative

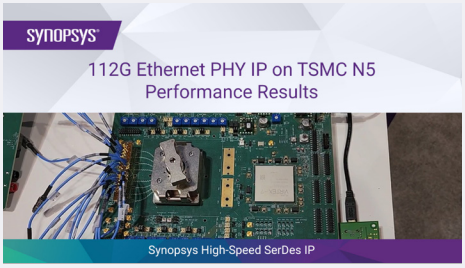

We connect our viewers with the information they seek. Whether it be technical, informing of industry trends, or exciting our customers with our latest innovations, our content is concise and helpful. Working in close collaboration with specialty 2D and 3D partners, we push execution excellence to the upper limit.

Thumbnail designs are intentional and systematic to maximize consistency and clickability.

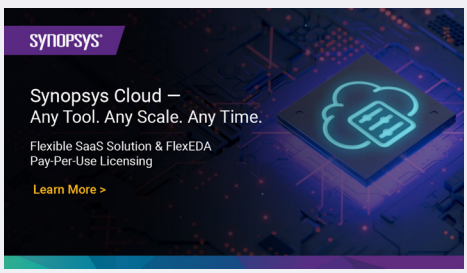

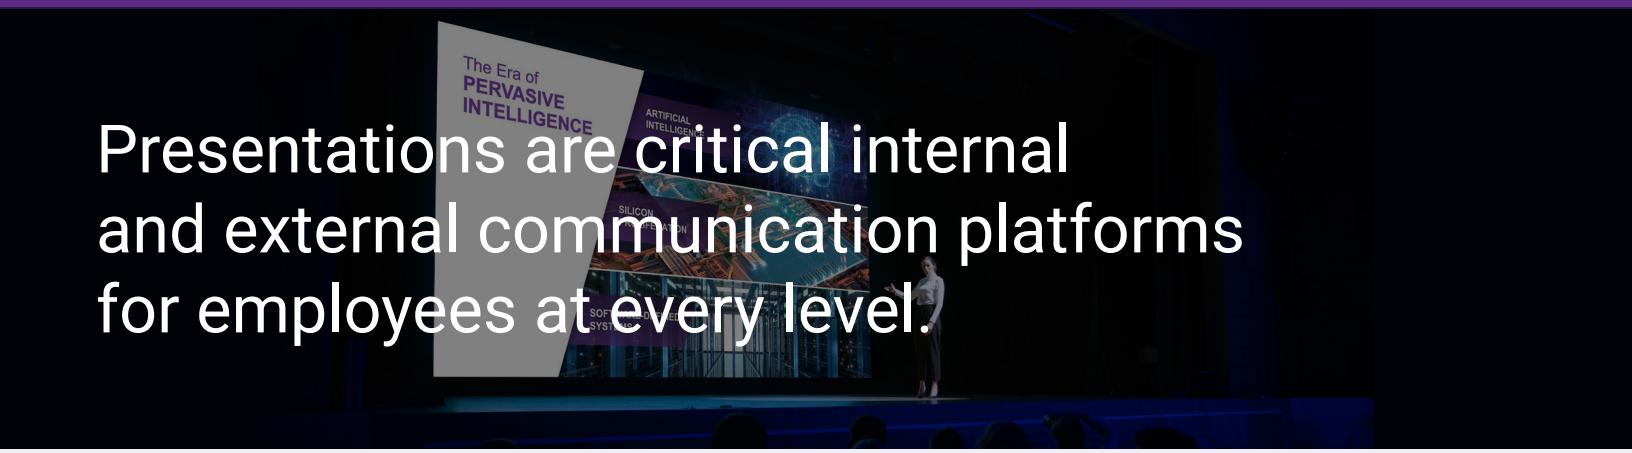

PRESENTATION & KEYNOTE

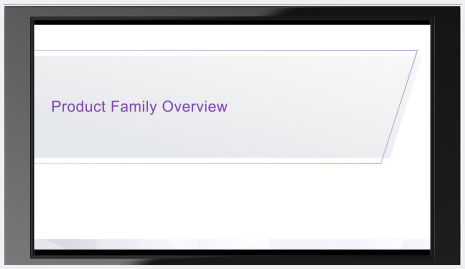

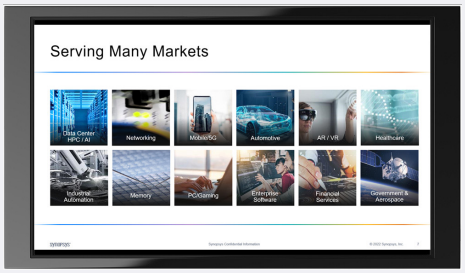

Presentations are critical internal and external communication platforms for employees at every level.

PowerPoint Presentation Template

Developing a presentation? Start with our default presentation theme and assets kit, which bring our stylized brand elements and palette into the PowerPoint Space. When used together, even the simplest presentation takes on a look consistent with the Synopsys Brand

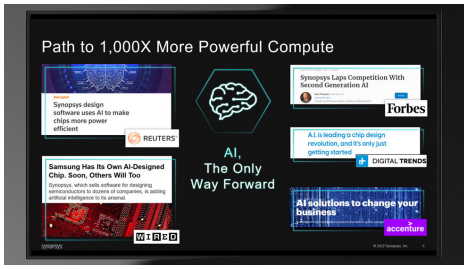

- Designs should convey messaging using relatable imagery, as opposed to lengthy text
- Text should be no smaller than 18pt. If you can not fit your text at a size larger than 18pt, you may want to reconsider your content
- The Synopsys PowerPoint template builds-in our primary and secondary palettes. Use those colors when building your content
- Dark purple background primarily uses white lines
- The PowerPoint assets kit includes various text boxes and other objects that you can copy into your presentation and edit as needed

Elevated Keynote Efforts

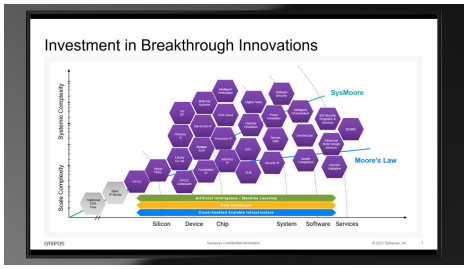

High-touch efforts may require the help of a presentation specialist to modify our standard approach for a unique look and feel. Below are some examples of designs that integrate brand elements with audience-specific content.

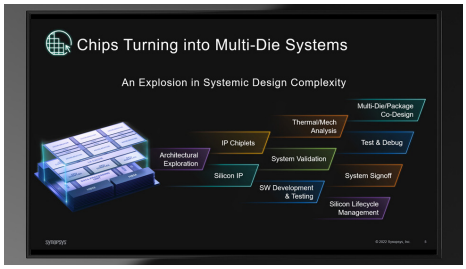

Special access users can ask questions or request our fully curated asset library by emailing us at identity@synopsys.com
